EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The title has been changed to read:

--DISTRIBUTED INFORMATION DISCOVERY THROUGH SEARCHING

SELECTED REGISTERED INFORMATION PROVIDERS.

NUMBERING OF THE CLAIMS

2. Claims 1-12 and 14-29 were originally presented for examination changed to claims 1-28 under rule 1.126, amended to cancel claims 13-28 (by numbering changed under rule 1.126) and add claims 29-69 (by numbering changed under rule 1.126). Claims 1-12 and 29-69 being at this time presented for examination.

3. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 14-70 been renumbered 13-69.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Sun Microsystems Inc.

"Project JXTA An Open, Innovative Collaboration" provided by applicant from a European search report that listed it as an X reference describes a P2P system doing searches on the internet and although it mentions indexing and implicitly would need to route the searches it provides no details of the search system structure or operation and in particular does not show or suggest "resolving the search query with an index of provider registrations to select one or more provide registrations; routing the search query to at least one provider specified by the one or more selected provider registrations;" as set forth in claim 1, the other independent claims 10, 47 and 58 having similar limitations. Gravano et al. « STARTS: Stanford Proposal for Internet Meta-Searching" details a metasearch model which on receiving a query sends it to sources it chooses as best to evaluate the query and merges the results returned from the sources it collects information periodically about each sources contents on which to base the decision of which source to query (see Gravano page 208, section 3; page 209, section 3.3 and page 210, section 3.4). Again Gravano does not show or suggest "resolving the search query with an index of provider registrations to select one or more provide registrations; routing the search query to at least one provider specified by the one or more selected provider registrations;" as set forth in claim 1, the other independent claims 10, 47 and 58 having similar limitations. Registration is interpreted as set forth in the specification and known in the art (see Thomas "URL Diving") as a way the indexing of a sight is requested rather than indexed by crawler with out active input. Claims 2-9, 11-12, 29-46 48-57 and 59-69 are dependent on the claims and are allowable for the same reasons, further these claims may have other limitations that further distinguish over the art of record.
